ACCENAME Sax 2 Mutterstock

Juglans-regia-0-121863

Family (Juglandaceae) — Genus (Juglans) Species (regia) Subspecies ()
Category: fruits → walnut

Etat de conservation de la variété (The conservation state of the variety on the positive list indicates the evaluation in the NPA yes = The variety is conserved. no = The variety is conserved.) : Varconservstat (yes)

ACCESSION : Field description	Value	Field name(s)
Institute code	Fructus (Vereinigung)	INSTCODE
Accession number	849	ACCENUMB
Collecting institute code	Fructus (Vereinigung)	COLLCODE
Acquisition date		ACQDATE
Country of origin	Switzerland	ORIGCTY
Donor institute code		DONORCODE
Type of germplasm storage		STORAGE

VARIETY :Field description	Value	Field name(s)
Category	fruits → walnut	CROPCAT
